

Antifreezes & Coolants

Mineral Range

TOTAL

Mineral Range

DESCRIPTION

There are **2 products** in the mineral range:

- **GLACELF CLASSIC** (antifreeze)
- **COOLELF CLASSIC -26°C** (coolant)

Additive content of both: **mineral 100%**.

Product advantages:

- *conformity with the main standards like AFNOR or the British Standard*
- *outstanding price/quality ratio*
- *effective protection against the engine freezing or overheating.*

ANTIFREEZE

GLACELF CLASSIC

- 1 litre, 20 litres, 60 litres, drum, in bulk

COOLANT

COOLELF CLASSIC -26°C

- 1 litre, 5 litres, 20 litres, drum, 1,000 litres, in bulk

These products have shown their high performance during corrosion testing required under the specifications:

- for hot plate corrosion
- for glassware corrosion

We recommend that the coolant is changed every 2 years.

SPECIFICATIONS*

Afnor NFR 15-601, BS 6580, SAE J1034, ASTM standards.

**only for your information, see technical data sheet*

GLACELF CLASSIC and COOLELF CLASSIC -26°C are recommended for all coolant circuits in heat engines.
